FOCUSED TRADING PRACTICE REPORT

Name: Muthumari.E

Date: 21.09.2026

INTRODUCTION:

This report is about my BBTCUSD paper trading experience. I used the 1-hour chart with SMA 50 and RSI to analyse the market and make trading decisions. I reviewed my trades to understand what I did well, what mistakes I made, and how I can improve.

GOOD TRADE EVALUATION:

In my good trades, I was able to enter and exit BTCUSD at suitable prices and make a profit. The trades from **86,217 to 86,512** and **85,444 to 85,728** were profitable. These trades helped me understand the importance of analysing the market and following a suitable trading setup.

POOR TRADE EVALUATION:

One of my poor trades was the trade from **83,837 to 83,728.44**, where I made a small loss. This shows that my entry and market confirmation could have been better. From this trade, I learned that I should wait for stronger confirmation before entering.

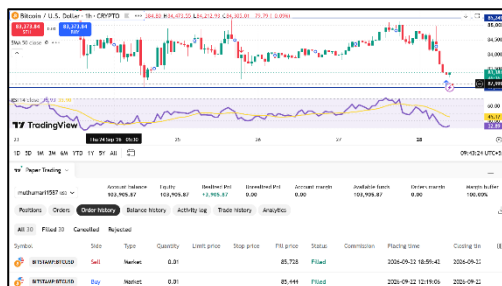

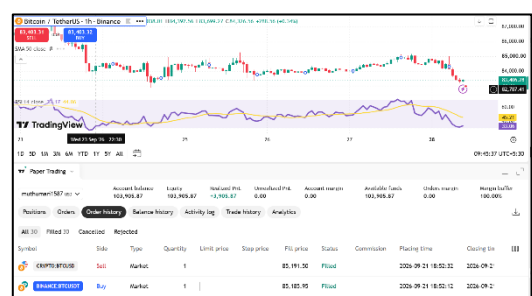

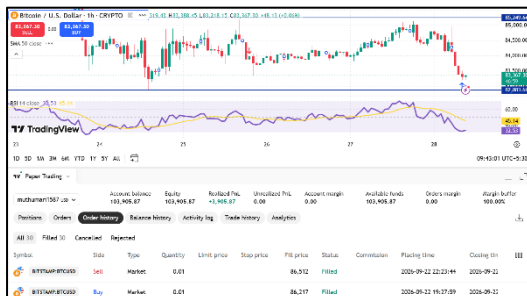

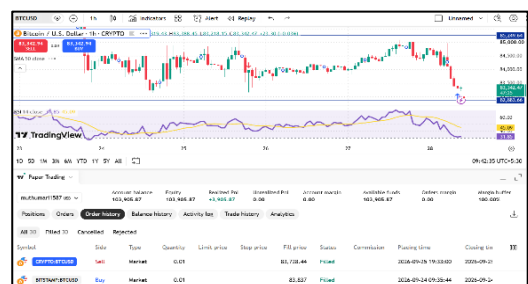

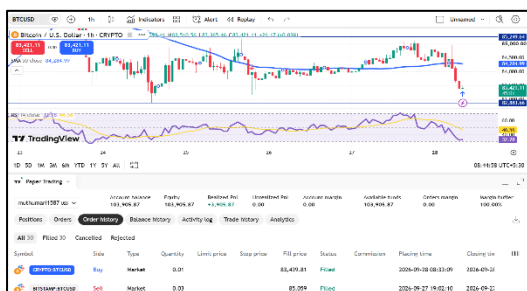

FOCUSED TRADING REPORT:

After reviewing my previous trades, I focused more on the market direction and indicator signals. In the later trade, I sold BTCUSD around **85,059** and the price moved down towards **83,439.81**. This shows that I was able to identify the downward movement and apply what I learned from my earlier trades.

OVERALL REFLECTION:

Overall, this trading exercise helped me understand my strengths and weaknesses. I improved my use of SMA 50 and RSI and became more aware of entry confirmation. I still need to improve my entry timing, trade management, and consistency in following my trading plan.
